

#SKWFP2

Technical Improvement: New salt and pepper cut level 4 knit shell.

Emerald CX[®]

Kevlar[®]/Wire Core[™]/Poly Knit with Split-Leather Flat Palms

#SKWFP2

This glove from our Emerald CX[®] series features a flat, grade-A split palm for rugged durability, good dexterity, and a dramatic increase in abrasion resistance for longer glove life. Palms are sewn in place securely with Superthread[™] for unparalleled seam integrity and endurance. Superthread[™] is an engineered thread that delivers unbeatable abrasion resistance, using a unique spinning process to blend three high-performance materials. Superthread[™] combats wear-through from abrasion like no other thread on the market to prevent one of the biggest causes of glove failure: seam wear through. String-knit glove body is our own Kevlar[®]-stainless-steel composite yarn blended with polyester. These gloves are ideal for moderate cut applications such as handling metal stampings, glass or other sharp materials. Strapped thumbs for increased durability.
