Arctic Knit™

13-Gauge ComFortrel® Glove Liner

#S13CPBW

Want to keep your hands both warm and dry in the workplace? You'll love wearing our ultra-comfortable Arctic Knit ComFortrel® glove liners.

Designed to fit neatly underneath your favorite pair of work gloves, these 13-gauge Arctic Knit glove liners offer a number of different advantages in the workplace. Since they're crafted from ComFortrel® fiber – a breathable engineered co-polymer known for its impressive moisture-wicking properties – these liners will repel dampness by pushing perspiration away from the skin to keep hands dry throughout your workday. Thanks to this feature, your skin temperature won't fluctuate the way that it would with other liners that trap sweat along the inside of your gloves. Another plus is that ComFortrel® dries much faster than cotton or polyester liners – meaning that if your hands do get a bit wet, you won't experience discomfort for long.

Available in both white (#S13CPWH) and speckled black (#S13CPBPW), these snug, seamless knit liners provide additional warmth, dryness, and comfort in the workplace – without sacrificing the dexterity you need to get the job done. They may be lightweight, but they sure are mighty.
